Exchange scholarship, South Korea

Korea University (KU)
Feb. 2020 - Aug. 2020

SKILLS

Frontend: Vue3, React, NextJS, TS/JS, CSS/SCSS, TailwindCSS, Pinia, ThreeJS, R3F, GLSL, GSAP

Design & Collaboration: Figma, UI/UX, Designer-Developer handoff

Tools & Practices: GitHub, Jira, Agile Methods, AI Agentic development

ACHIEVEMENTS

→ **Adapted quickly to new technologies**, becoming fully productive in **Vue3, Pinia, Bootstrap/TailwindCSS** within three weeks to contribute effectively to a client project.

→ **Collaborated closely with a UI/UX designer** to enhance the user experience and streamline designer-to-developer handoffs, ensuring design feasibility and technical alignment with the existing tech stack.

→ **Led and delivered a complete redesign** of a production application within **two agile sprints**, improving both usability and visual consistency across the product.

→ **Stabilized project delivery** by addressing ambiguity in requirements; introduced and implemented SCRUM-based agile practices in coordination with the Product Owner, improving team communication and planning reliability.
